

See how it feels

Dräger X-plore® 1300 and X-plore® 1700 series:
The comfortable choice for breathing safely

See how it feels

Developed in cooperation with users for users:

Dräger X-plore 1300 and 1700 series

Our particle filtering face pieces not only assure professional protection against dust, but easy use and a high level of comfort. Regardless if face pieces are worn for a minute or hours, the longer the use, the more important the level of comfort. Safety engineers around the world have confirmed: If respiratory protection is not comfortable to wear and easy to handle, it will not be used.

We listened to the demands of respiratory protection users from a wide range of industries and turned their requirements into intelligent solutions users will appreciate.

You can choose between face pieces in all three EN protection classes FFP1, FFP2 and FFP3 - optionally available with the CoolMAX™ exhalation valve for additional comfort. Odour stopping versions, containing an activated carbon layer, are ideal for users who battle with unpleasant nuisance odours.

Experience the feel of comfort at work.

Dräger X-plore® 1300

VarioFLEX™ head harness with EasyStop

Easy donning and doffing and a pressure-free fit for high comfort. Thanks to EasyStop, the head harness can easily be adjusted to fit various head sizes, ensuring a comfortable and safe fit.

Nose seal

The nose seal ensures an effective seal around the nose. It is sweat-absorbing and comfortable to wear.

Formed mask body

The interior volume ensures wearing comfort along with easy communication. Inside, the mask body is specially reinforced, thus ensuring dimensional stability throughout long periods of time.

CoolMAX™ exhalation valve (optional)

Breathe easy and comfortably with extremely low breathing resistance. It releases humid and warm air, preventing heat build-up underneath the mask.

CoolSAFE™ filter material

It combines special high-performance filter media offering two important advantages - low breathing resistance and high filter performance in one mask. The material also exceeds the challenging dolomite dust test requirements.

Special features of Dräger X-plore® 1330

Dräger X-plore 1330 FFP3

Practical and comfortable:

The VarioFLEX™ head harness with a four-point adjustment system and extra-wide textile straps ensures the best possible fit.

Quick and easy to use:

The straps are arranged for fast donning. An integrated safeguard prevents straps from slipping out of place.

Secure and comfortable:

Integrated, all-around comfort sealing.

Clean and hygienic:

Each face piece is individually packed in its own plastic bag.

Individually adjustable:

Available in two different sizes S/M and M/L – the right size for different face shapes.

Dräger X-plore® 1700

VarioFLEX™ head harness

Easy donning and doffing and a pressure-free fit for high comfort. The soft, tearproof elastic can easily be adjusted to fit various head sizes and prevents hair entanglement.

CoolSAFE™ filter material

It combines special high-performance filter media offering two important advantages - low breathing resistance and high filter performance in one mask. The material also exceeds the challenging dolomite dust test requirements.

Flexible nose clip

Ensures a great fit in the most critical area.

CoolMAX™ exhalation valve (optional)

Breathe easy and comfortably with extremely low breathing resistance. It releases humid and warm air, preventing heat build-up underneath the mask.

Soft inner layer

The soft and hypoallergenic inner layer not only repels moisture but is also very comfortable to wear.

Hygienic individual packaging

Each face piece is individually packed and sealed in a plastic bag, ensuring it stays clean and hygienic.

Colour coding

Fast recognition without confusion: colour coding classifying the three EN protection levels dark-blue (FFP1), lightblue (FFP2) and white (FFP3) provides greater security when selecting the right mask.

If you would like to know more about our complementary protective eyewear X-pect 8000, please turn over to the next page.

Respiratory protection and protective eyewear – a sensible combination

Whenever you have to protect your respiratory system while working, most situations require that you protect your eyes as well (and vice versa). Our eyes are particularly prone to injury when working with liquids or in environments containing dust particles or fragments. And in a matter of seconds, irreparable damage may occur. But the solution is really simple. Often all that is needed is to wear well-fitting, stable protective glasses or goggles which offer effective eye protection against injury. In developing the Dräger X-pect 8000 protective eyewear collection we focused on the good combination of protective eyewear and breathing protection so that it complement one another.

The Dräger X-pect 8000 series is characterised by the following three attributes: High wearer comfort, best possible safety and modern design.
