

RUGGED AND RELIABLE GAS MONITORING

Keeps workers safe and connected

When you perform tasks in potentially gas-hazardous areas, reliable performance monitoring is essential to ensure the job is done safely and efficiently.

Honeywell BW™ RigRat is the most intuitive area gas monitor built for industrial applications on the market. It is the first gas detector available to offer a built-in noise sensor, analogue input, and location in addition to the flexible wireless features. The **RigRat transportable monitor works alone or can connect wirelessly to nearby devices to create a safety perimeter.**

BW™ RigRat helps your company turn temporary monitoring safety into a strategic advantage by reducing costs, simplifying standard operating procedures, reducing costs, and driving productivity.

TIME SAVINGS

Streamlined Compliance Auditing = 3 HOURS

Intelliflash – Save up to 1.5 hours of audit time per year, which translates into an annual savings of \$112.50 per unit.

Built-in calibration certificate – Save up to 1.5 hours looking for printed documentation.

Reduced Servicing = 30 MINUTES

Scratch-resistant LCD cover – Save 30 minutes on average, and having to replace an entire front shell, by preventing unwanted scratches.

Accelerated Commissioning = 30 MINUTES

Wireless assistant – Save 30 minutes of commissioning time per system by allowing the user to see the wireless connectivity quality and ensure the link is correct.

COST REDUCTION

Less Equipment = \$1,700 PER MONITOR

Battery runtime up to 2 months – Save \$2000 per monitor on an annual basis to cover 24-hour shifts.

Infrastructure Saving = \$500 PER MONITOR

Honeywell Device configurator app – Simplifies the user interface and removes the need for a calibration station (\$3000).

Noise sensor – Provides a rough noise map, reducing the need for dosimeter measurements unless noise is detected.

INCREASED PRODUCTIVITY

Faster Decision Making 2 minutes = 1 life

Additional input and wireless relay options – Helps automate the standard operation procedure around a gas leak situation.

Noise sensor – Reduces the need for additional noise equipment.

Weather data – Enhances worker safety in downwind operations.

Reduced Training Time = 30 MINUTES

Honeywell Device configurator app – Thanks to the outstanding ease of use of the mobile app, workers only need 30 minutes of training to learn how to operate the monitor. The remote set-up feature allows trained technicians and safety managers to remotely set the configurations and calibration values.

BW™ RigRat offers you real-time situational awareness in area monitoring so you can make fast decisions to protect workers and infrastructure.

With unmatched technology, visibility on gas readings, and connectivity, BW™ RigRat minimizes your cost of ownership, speeds up your response plan, and maximizes your confidence.
