SAFETY

Fixed Gas Detection

Why Choose Rockall Safety?

Our dedicated technical sales specialists are fully trained and certified, providing customers with reliable gas detection equipment.

Since 1995, Rockall Safety have been supporting clients who require the highest safety standards, providing them with the best technology and dedicated team for each solution.

Our highly experienced engineers offer effective, bespoke solutions for each gas detection requirement.

Our wide range of clients include small companies, medium enterprises, and large industrial entities and national organisations.

With a wide spectrum of industries that utilise our products and services, our key responsibilities as a dedicated company, are to provide an excellent customer experience as well as reliable technology that you and your colleagues can depend on.

Operating throughout the UK, our success as a growing business is based on our customer-orientated philosophy; customers expect a prompt, professional and efficient service, value, and above all the right products to help them carry out their work as safely as possible.

We'd love to hear from you, so call our team today on 02920 759 683

Fixed Gas Detection

Take these steps before commissioning

- Ensure the installers are certified to expected industry standards.
- To prevent false alarms, check that the detector is placed on a solid mount, free of vibrations.
- Test your system thoroughly before going live, ensuring full integration in addition to individual unit operability.

What are the advantages of using Fixed Gas Systems?

Continuous Protection:

Round-the-clock gas detection across all critical areas.

Cost Saving:

Fixed systems can help reduce high repair and unit replacement costs, injuries through human error, and training.

Improved Integration:

Take full control and monitor your working environment at a higher level of safety.

Fixed gas detection systems can activate emergency extraction, shut down processes, and instantly alert control operators.

Call today for a free, no obligation consultation.

Installation

Installation of Fixed Gas Detection Explained

Survey

We'll visit your premises and examine critical workplace areas to gain a comprehensive understanding of your day-to-day operational processes, and the potential risks they could pose to your staff and premises.

Our surveyors will be asking vital questions and inspect each process in detail to fully assess potential risks and so begin planning the implementation of the technical solutions required to resolve them.

Installation

Our fully certified engineers will expertly install your complete gas and / or flame detection system.

This will include the electrical installation of your full gas detection system including links to your desired outputs (Siemens, PLC, Modbus, etc).

Commissioning

A complete system check and test by our certified engineers.

Explanation and demonstration of the system working with your safety and engineering teams.
Full factory / Site-Acceptance-Test.

Service

Scheduled visits ensure continuous gas and flame detection, protecting your people and your buildings 24/7, 365 days a year.

Full system and sensor-date-codes health check whilst on site delivering first class service and expert reassurance.

Full technical service and hardware health check carried out with calibration-documentation and system health report issued on each service.

Fixed Gas Servicing

Basic Plan

- + Regular Scheduled Servicing
 - + Detailed Gas Detection Report
 - + Official Calibration Certificate
-

Standard Plan

- + Regular Scheduled Servicing
 - + Detailed Gas Detection Report
 - + Official Calibration Certificate
 - + Dedicated Rockall Contact
 - + 5% Discount on Spare Parts
-

Premium Plan

- + Regular Scheduled Servicing
 - + Detailed Gas Detection Report
 - + Official Calibration Certificate
 - + Dedicated Rockall Contact
 - + Fast Track Call Outs
 - + 10% Discount on Spare Parts
-

Our engineers are regularly trained by manufacturers when products are introduced or updated, always ensuring the highest standards of workmanship at all times.

Featuring top-of-the-line safety equipment ranges, sourced from some of the leading manufacturers around the world. At Rockall Safety we supply only the best industry standard equipment available.

Industries We Work With

Food & Beverage

At Rockall, we understand the risks workers face within the Food and Beverage Industry. Regular exposure to gases such as Carbon Dioxide, Nitrogen and Ammonia, which are commonly produced and utilised, can be a serious health hazard. Our gas detection products and services are specifically designed to safeguard workers, prevent accidents, and ensure the highest level of compliance.

Water & Wastewater

We deeply understand the dangers workers in this field can face daily. Without the correct (fully serviced) equipment, each working operation poses a serious, almost guaranteed risk to life. So without compromise, we will always strive to provide the highest levels of safety and compliance.

Petrochemicals

From medication to plastics, petrochemicals are a common low-cost solution for manufacturing that present a unique set of safety challenges. Rockall Safety have gained decades of technical experience working in partnership with some of the UK's largest industrial companies, providing an essential role in the provision of critical equipment and servicing, to help ensure worker safety and maintenance of the highest safety standards.

Construction

We offer an extensive selection of products designed to protect workers throughout the construction industry. From safety harnesses to portable gas monitors, we have an extensive range of products that can help ensure a high standard of protection for your workers whilst operating in a hazardous environment.

Oil & Gas

Rockall Safety provide a wide range of fixed and portable gas detection solutions, sourced from the world's leading manufacturers, designed to withstand the toughest industrial environments and provide real-time situational awareness. We also provide confined-space solutions, including tripods, winches, fall arrest, harnesses, self-rescue, breathing equipment, and rescue stretchers.
